## Frequently Asked Questions

Here are some questions/answers that we are frequently asked. If you have additional questions that are not covered here, please feel free to give us a call at (734) 713-1300.

### 1. What is Advanced Veterinary Care Group?

Advanced Veterinary Care Group is a new concept in veterinary medicine staffed by a team of highly experienced and caring general practitioners with special interest in several key areas of medicine. We work as a partner with your primary care veterinarian to provide services and treatments not currently available through their office location.

### 2. Why would my pet need to go to Advanced Veterinary Care Group?

Sometimes your primary care veterinarian needs specific testing, treatments or procedures that they simply cannot offer through their facility. Specialty veterinary facilities exist, but not everyone can take advantage of seeing a Specialist. That's where we come in. In

human medicine diagnostic and treatment centers provide primary care physicians with the services they need. The Care Group is the only facility that does the same on behalf of your veterinarian to help them continue to manage the case. Your pet's care

remains in the hands of the veterinarian you trust. Our unique delivery of services coupled with our affordable general practice pricing makes premium medical care more accessible for your loved one.

### 3. Do I need to have an appointment?

Yes. Because we are strictly a diagnostic & treatment center, all patients are expected to be involved in a current case with their regular veterinarian. Your doctor will recommend our services on an as needed basis and provide you with information to schedule your appointment.

### 4. Do you have an extended payment plan?

All payments are required at time of service rendered. AVCG accepts cash, MasterCard, Visa, Discover and Care Credit, a medical finance plan. If you are paying through your regular veterinary hospital, their billing policies apply.

### 5. Can AVCG be my regular clinic?

No, our practice only provides diagnostic services and treatments for your regular clinic. To most effectively manage your pet's health, Advanced Veterinary Care Group works directly with your pet's doctor. AVCG does not do routine testing or provide wellness care.

### 6. How do I get an appointment?

If your pet has need of a specific test or procedure not currently performed at your primary care veterinarian's office he or she will determine if AVCG can perform the service. Your doctor will then complete a diagnostic/treatment request form (available on our web site [www.advancedveterinarycare.net](http://www.advancedveterinarycare.net)) and ask you to contact us to make an appointment. Please be sure to ask your doctor to provide us with a copy of your pet's medical history. This can be sent to us via fax by your veterinarian prior to the day of your appointment.

### 7. Will my veterinarian be updated?

The partnership between you, your veterinarian and our medical team is essential and helps ensure the most comprehensive care possible for your pet. Our team of doctors keeps both you and your pet's doctor updated as to your pet's condition. Detailed written medical reports along with CD-ROMs with pertinent diagnostic imaging are always sent to your primary veterinarian's office once the case is completed at AVCG.

### 8. For what type of test or procedures could my pet be sent to you?

At AVCG, we're capable of performing MRI scans, Endoscopic Evaluations, Abdominal and Thoracic Ultrasounds, Acupuncture Sessions, Chemotherapy, Digital X-rays, Stem Cell Therapy and a wide range of Soft Tissue and Orthopedic Surgeries. Your veterinarian will discuss your case with us and determine a specific set of diagnostics, procedures or treatments that your pet requires before you are sent to AVCG. We will perform only the procedures and treatments your veterinarian directs unless new information comes to light; at which time we will contact your veterinarian to discuss any changes to his/her treatment plan. You will then be informed of your veterinarian's recommended changes before initiating the new treatment plan.

Vet-MR

## How to prepare and what to expect

Unless otherwise instructed, all patients will be admitted the morning of their procedure. You will be shown to a consultation room where you will have a one-on-one discussion with our veterinarian to review the treatment plan and answer any of your questions. After your pet is admitted, a thorough examination will be conducted and any pre-procedure testing will be performed.

Whatever fee you have been quoted by your veterinarian is all-inclusive for that procedure. There are no hidden charges for blood work, x-rays, bandages or medications.

### On the day of your appointment:

- I. Your pet may have water overnight but please do not feed him/her for at least 12 hours prior to your appointment.
- II. Continue your pet's normal medication schedule and please bring all medications with you.
- III. Bring a copy of your pet's medical report and any x-rays or recent test results with you.
- IV. If you are unable to keep your appointment, please contact us at least 24 hours prior to your appointment.
