

Who are we?

Eric R. Larsen, DVM, MBA

Dr. Larsen graduated in 2003 with his DVM degree from Michigan State University and also holds a Master of Business Administration from Texas A&M University. Labeled the "professional student", Dr. Larsen also has his Bachelor's of Science from Michigan State as well as over 500 hours of veterinary CE.

Surgery and Diagnostic Imaging have always been Dr. Larsen's passions. His experience ranges the gamut from reconstructive soft tissue to orthopedic procedures. He has extensive experience in ultrasound and radiology and has expanded his skill set to include magnetic resonance imaging.

Dr. Larsen participated in the development of Advanced Veterinary Care Group in order to work closely with local General Practitioners to help referring DVMs elevate overall patient care in Michigan. By partnering with GP's and offering modalities to augment their current patient care, AVCG strives to optimize diagnostic results and case outcomes.

Dennis G. Elmer, DVM

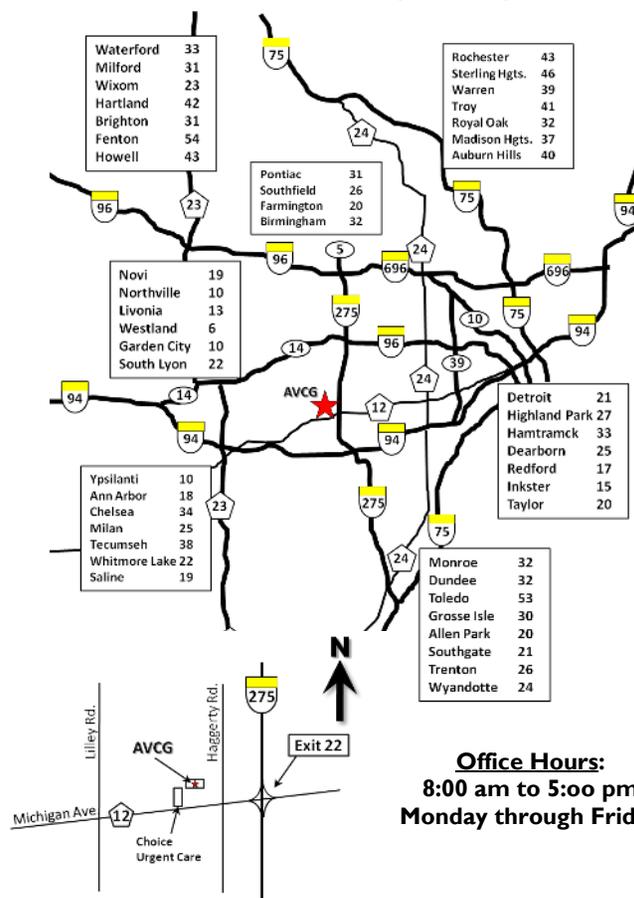

Dr. Elmer graduated from Michigan State University College of Veterinary Medicine in 1995 at the tender age of 23. He took advantage of the Veterinary Scholars program to graduate with his

bachelors and doctorate in only 5 years.

His area of greatest interest has always been surgery and he has spent the last twenty years honing his skills in the operating theater. Tackling both soft tissue and orthopedic cases with equal vigor, he has been fortunate to provide relief work for some of the busiest veterinary hospitals in the Detroit Metro area. The heavy case loads seen at these facilities allowed him to achieve proficiency with a broad spectrum of surgical procedures.

His love of surgery has compelled him to dedicate himself full time to providing his services to his colleagues in the referral community by co-founding Advanced Veterinary Care Group. The Care Group has invested in state of the art equipment so that Dr. Elmer can cheerfully tackle the diverse number of surgeries that he loves to perform.

Frequently Asked Questions

Here are some questions/answers that we are frequently asked. If you have additional questions that are not covered here, please feel free to give us a call at (734) 713-1300.

What is Advanced Veterinary Care Group?

AVCG is Michigan's original Veterinary Diagnostic and Treatment Center made up of a committed group of general practitioners who have come

together to offer their skills and selected areas of expertise to the veterinary community. We are not a traditional veterinary practice. As general practitioners, however, we have come to recognize that certain procedures and diagnostics are difficult to offer in general practice due to the high cost of equipment investment for infrequently performed procedures. We have centralized diagnostic and treatment equipment along with a dedicated team of professionals to allow your clinic to extend the list of services your hospital can offer.

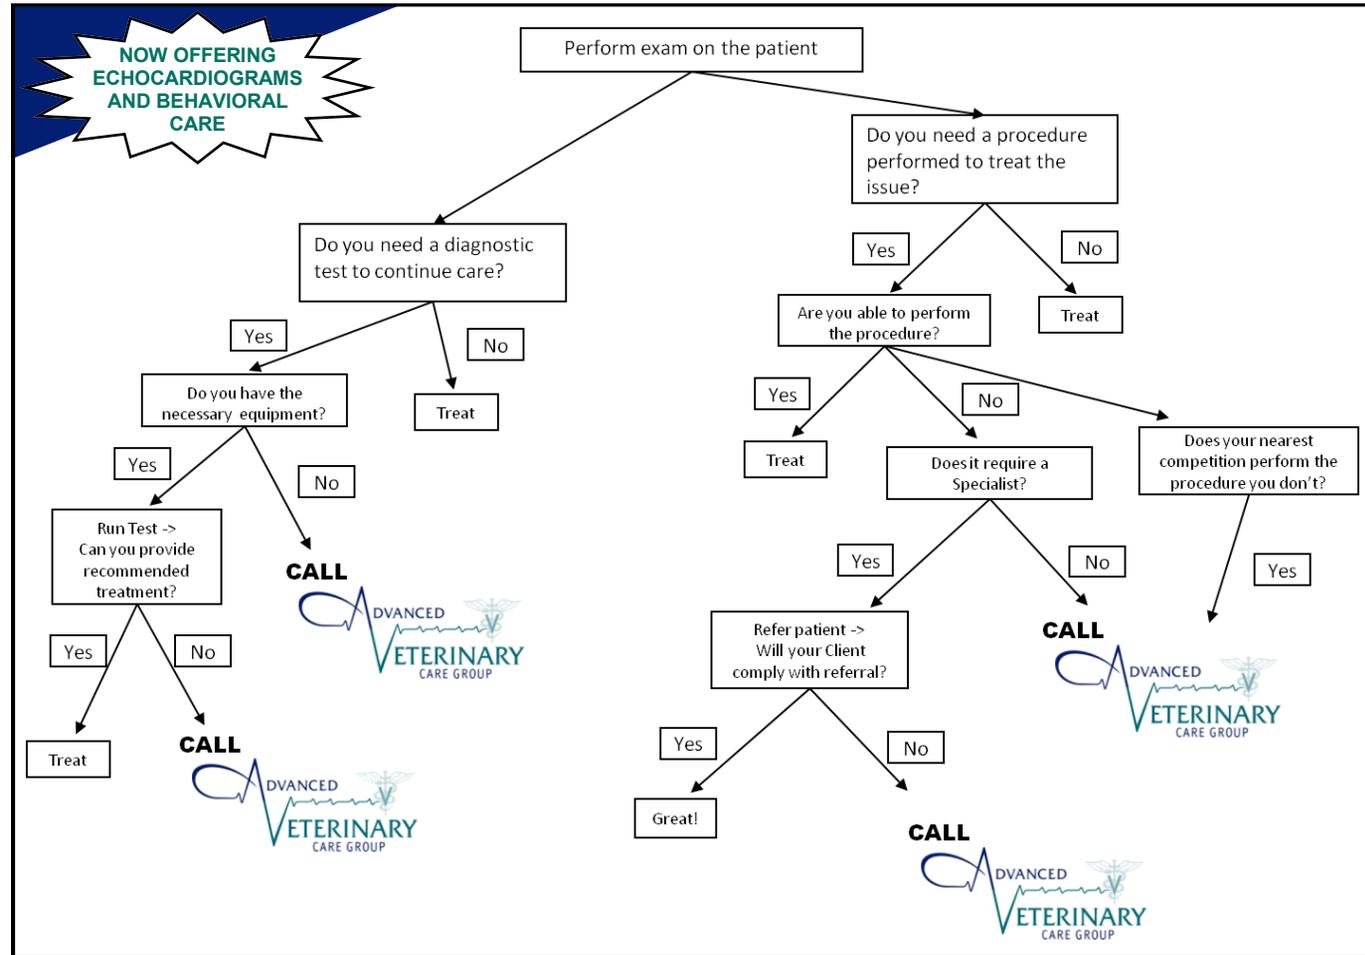

Why would my patient need to go to AVCG?

You may choose to utilize our hospital if your client declines referral to a specialty practice or your patient requires specific testing, treatments or procedures that you are not experienced in, do not offer or for which you don't have the necessary equipment. In addition to the highly experienced medical staff, AVCG has state-of-the-art, highly specialized equipment including plated fracture repair instruments, CO₂ laser, digital ultrasound & x-ray, endoscope, MRI, therapy laser and underwater treadmill.

Who assumes the professional liability for procedures done at your practice?

Just like all of your current referral arrangements with emergency and specialty practices, medical liability always lies with the doctor performing the procedure. Therefore liability for all work performed by the Care Group lies with our professional liability insurance. We are happy to intervene on your behalf whenever there is an issue for your client. We understand how important your bond is with your client and will do whatever necessary to resolve situations in the best interest of your hospital.

How to Best Utilize Advanced Veterinary Care Group

Did You Know?

Since 2008 over 500 veterinarians from 235 veterinary hospitals in Michigan, Ohio, Indiana, Illinois and Canada have utilized the Care Group!

Pet Owners (your clients) have told us:
"It's worth the drive to Canton to save thousands of dollars and we're very pleased with the care we received!"
